Art Unit: 3742

This application is in condition for allowance except for the following formal matters:

Claims 1-11 are objected to because of the following informalities:

In claim 1, the recitation of "(12)" at line 18 for the hole should be deleted.

In claim 9, the term "electric" recited at line 5 should be changed to "electrical" for being consistent.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Magnusson (US 4,394,566).

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show or fairly suggest a heating arrangement for a furnace, wherein the arrangement comprises at least a heating element cassette having a heating zone (i.e., heating rod) that projects out from and defines an angle with a longitudinal axis of the cassette, a hole for each cassette at the furnace insulation wherein the hole is larger at its outer end than at its inner end to enable the cassette to be rotated in a vertical plane as the heating zone is inserted through the hole and into an operating position substantially parallel with the furnace wall, and a wedge body located between the hole and the cassette in the manner recited in claim 1.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
